

Your fleet
management, smarter.

Safe Fleet is a modular platform for integrated fleet and human resources management. Each module can be activated separately, ensuring flexibility, efficiency, and scalability.

Powered by AYNIX SRL.

Problem

Drivers and administrators waste time with paperwork and inefficient communications.

Low fleet **traceability**

Manual control
of **attendance**
and **permits**

Expired documents =
fines and blockages

Slow administrative
support

SafeFleet

Solution

(introduction to the modules)

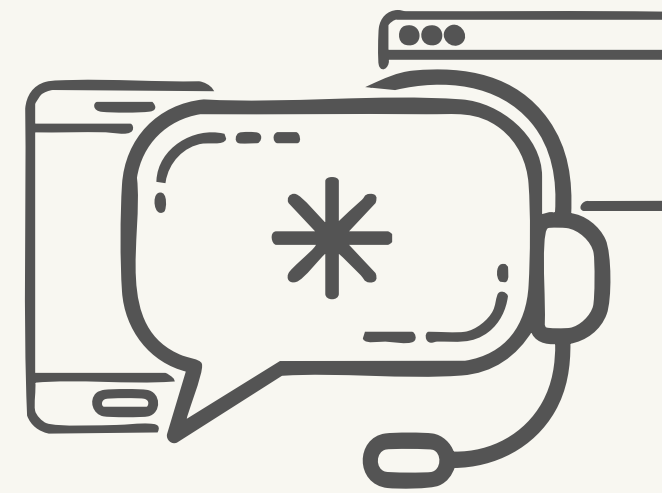

Solution: integrated modular platform

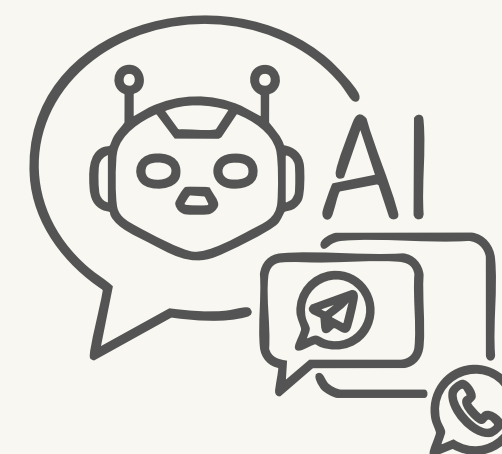

Module 1 – Proactive document management

Module 3 – Digital Fleet Inventory

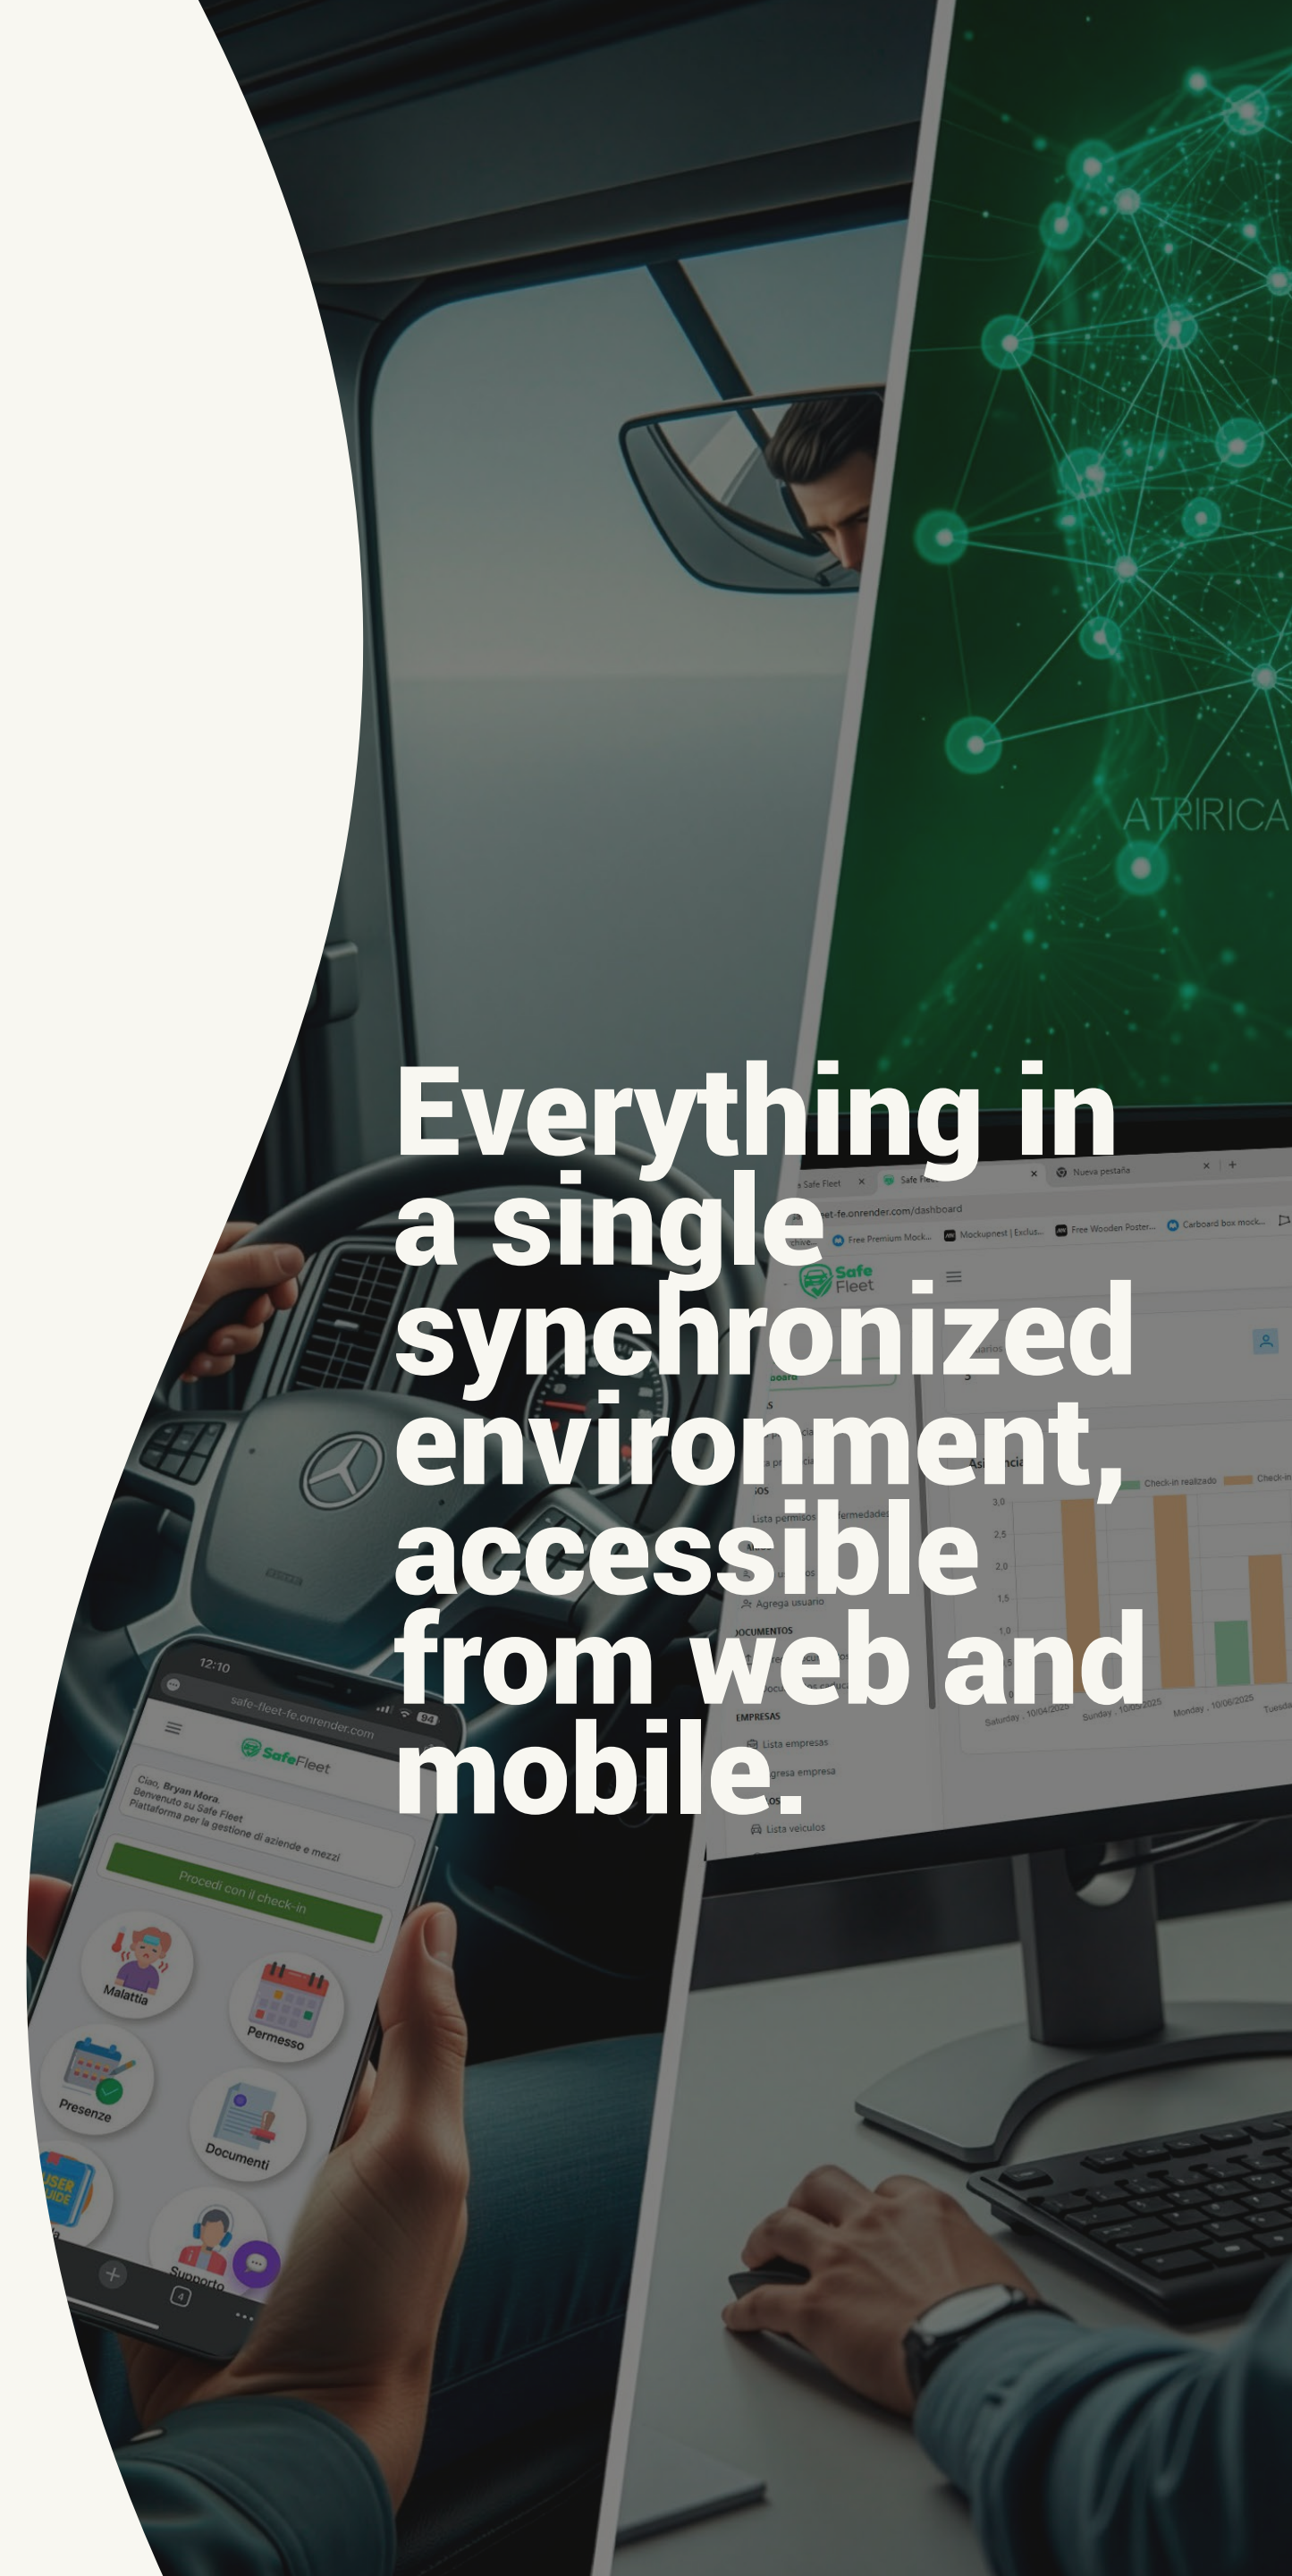

Module 2 – Digital attendance

Module 4 – AI Assistant (Chatbot) (optional upon client request)

SafeFleet

Everything in
a single
synchronized
environment,
accessible
from web and
mobile.

Proactive document management

Module 1

Digital archive of all HR and fleet documents.

"Documents about to expire" section with automatic alerts.

Notifications by email or WhatsApp to the person in charge.

Version history and certifications.

→ Benefit: reduces the risk of non-compliance and improves operational planning.

SafeFleet

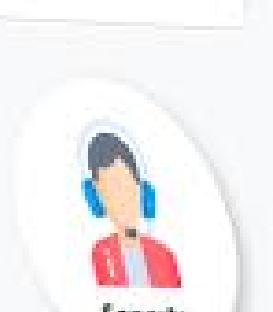

Digital attendance

Module 2

Expanded and reinforced

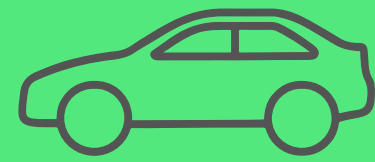

- ✓ **Digital check-in / check-out** registration (app, QR or GPS).
- ✓ **Automatic calculation** of hours worked, overtime, holidays, and absences.
- ✓ **Analytical dashboard** by team, vehicle, or project.
- ✓ **Synchronization** with corporate calendar and HR modules.
- ✓ **Automatic export** of reports (Excel / ERP API).
- ✓ **Automatic alerts** for absences or irregularities.
 - Benefit: reduces administrative bureaucracy and increases accuracy and transparency in personnel costs.

SafeFleet

Digital Fleet Inventory

Module 3

Complete management of each vehicle with technical data, contracts, and maintenance.

Analysis of vehicle costs, usage, and availability.

Tracking of expirations (insurance, inspections, reviews).

Direct connection with the Documents and Attendance modules.
→ Benefit: a single source of truth for operational and administrative decisions.

AI Assistant – Chatbot

Module 4

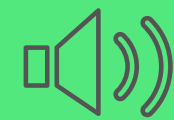

Optional module, integrable upon client request.

Conversational interface (WhatsApp, Telegram, Microsoft Teams).

Immediate access to HR and fleet data.

Proactive notifications about expirations, permits, maintenance.

Driver support: vacation requests, incident reports, alerts.

Customization by language, sector, and workflow.

→ Benefit: optimizes administrative processes and improves communication between the office and drivers.

SafeFleet

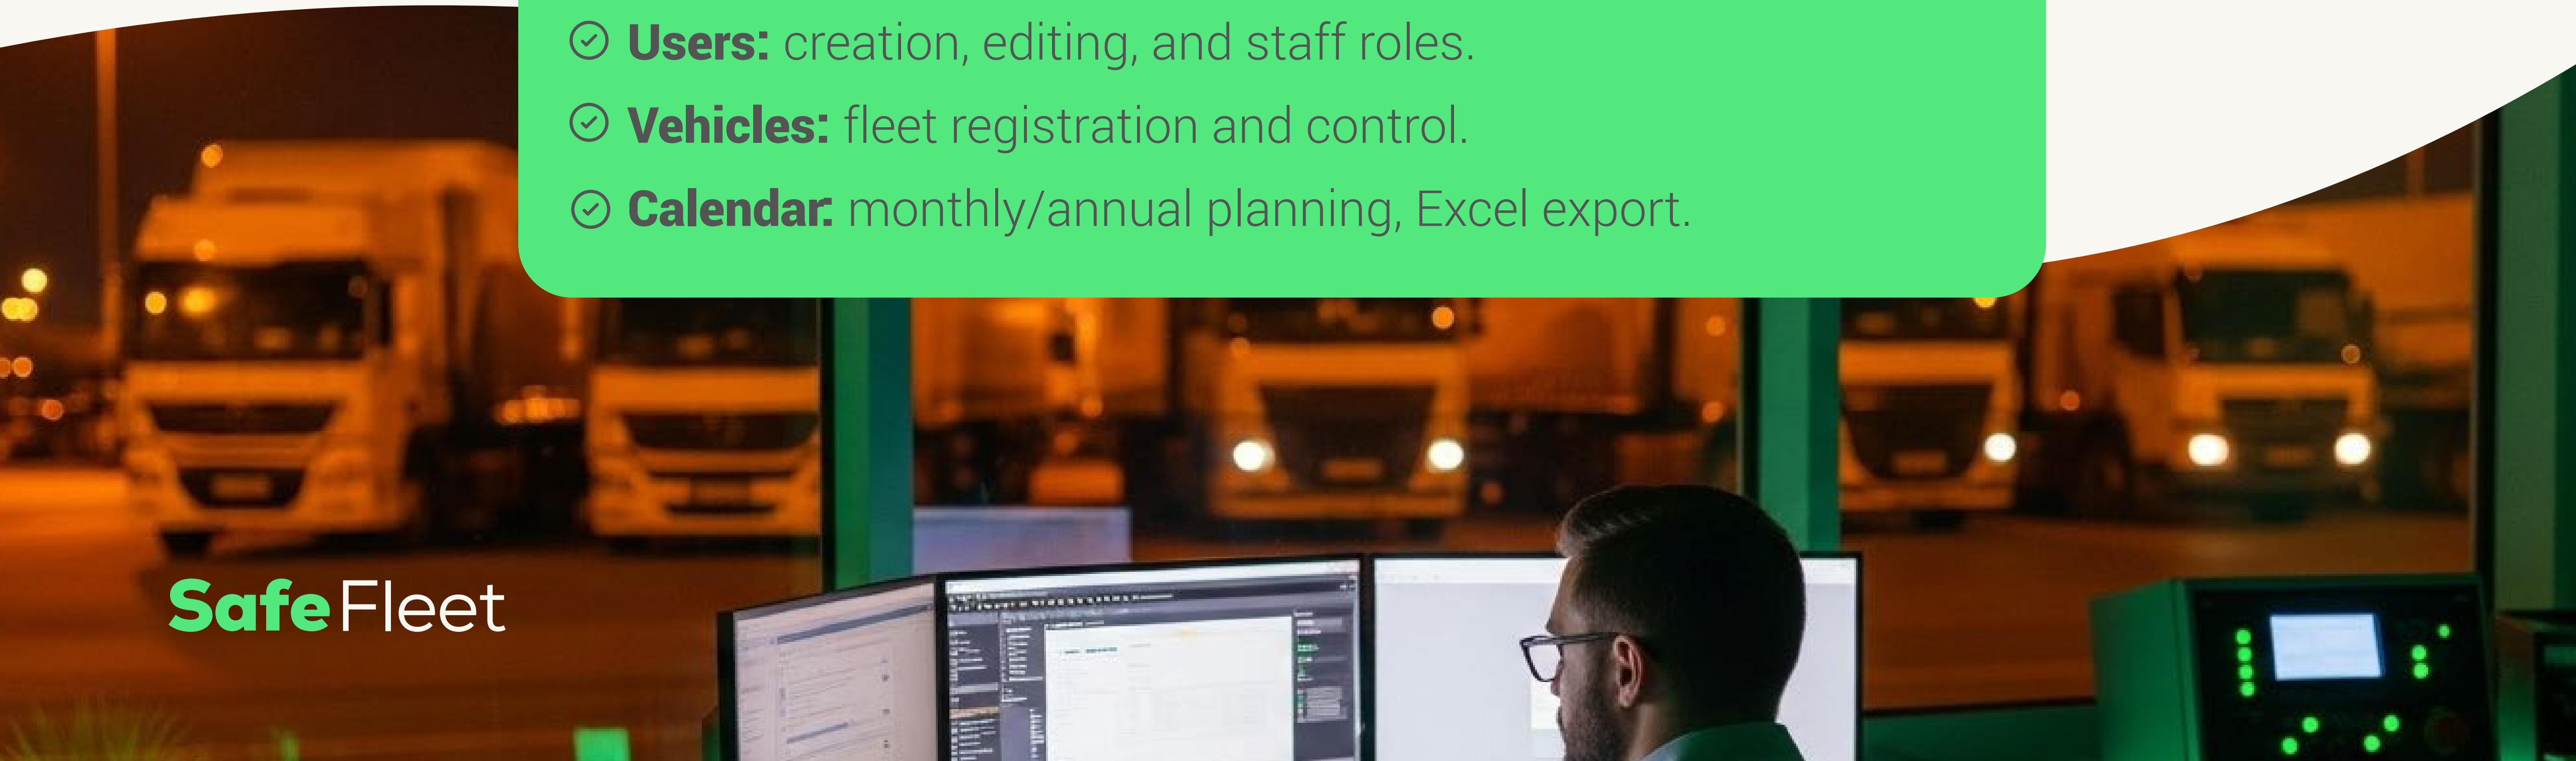

SafeFleet

How does it work?

Safe Fleet operates as an integrated management platform (All-in-One):

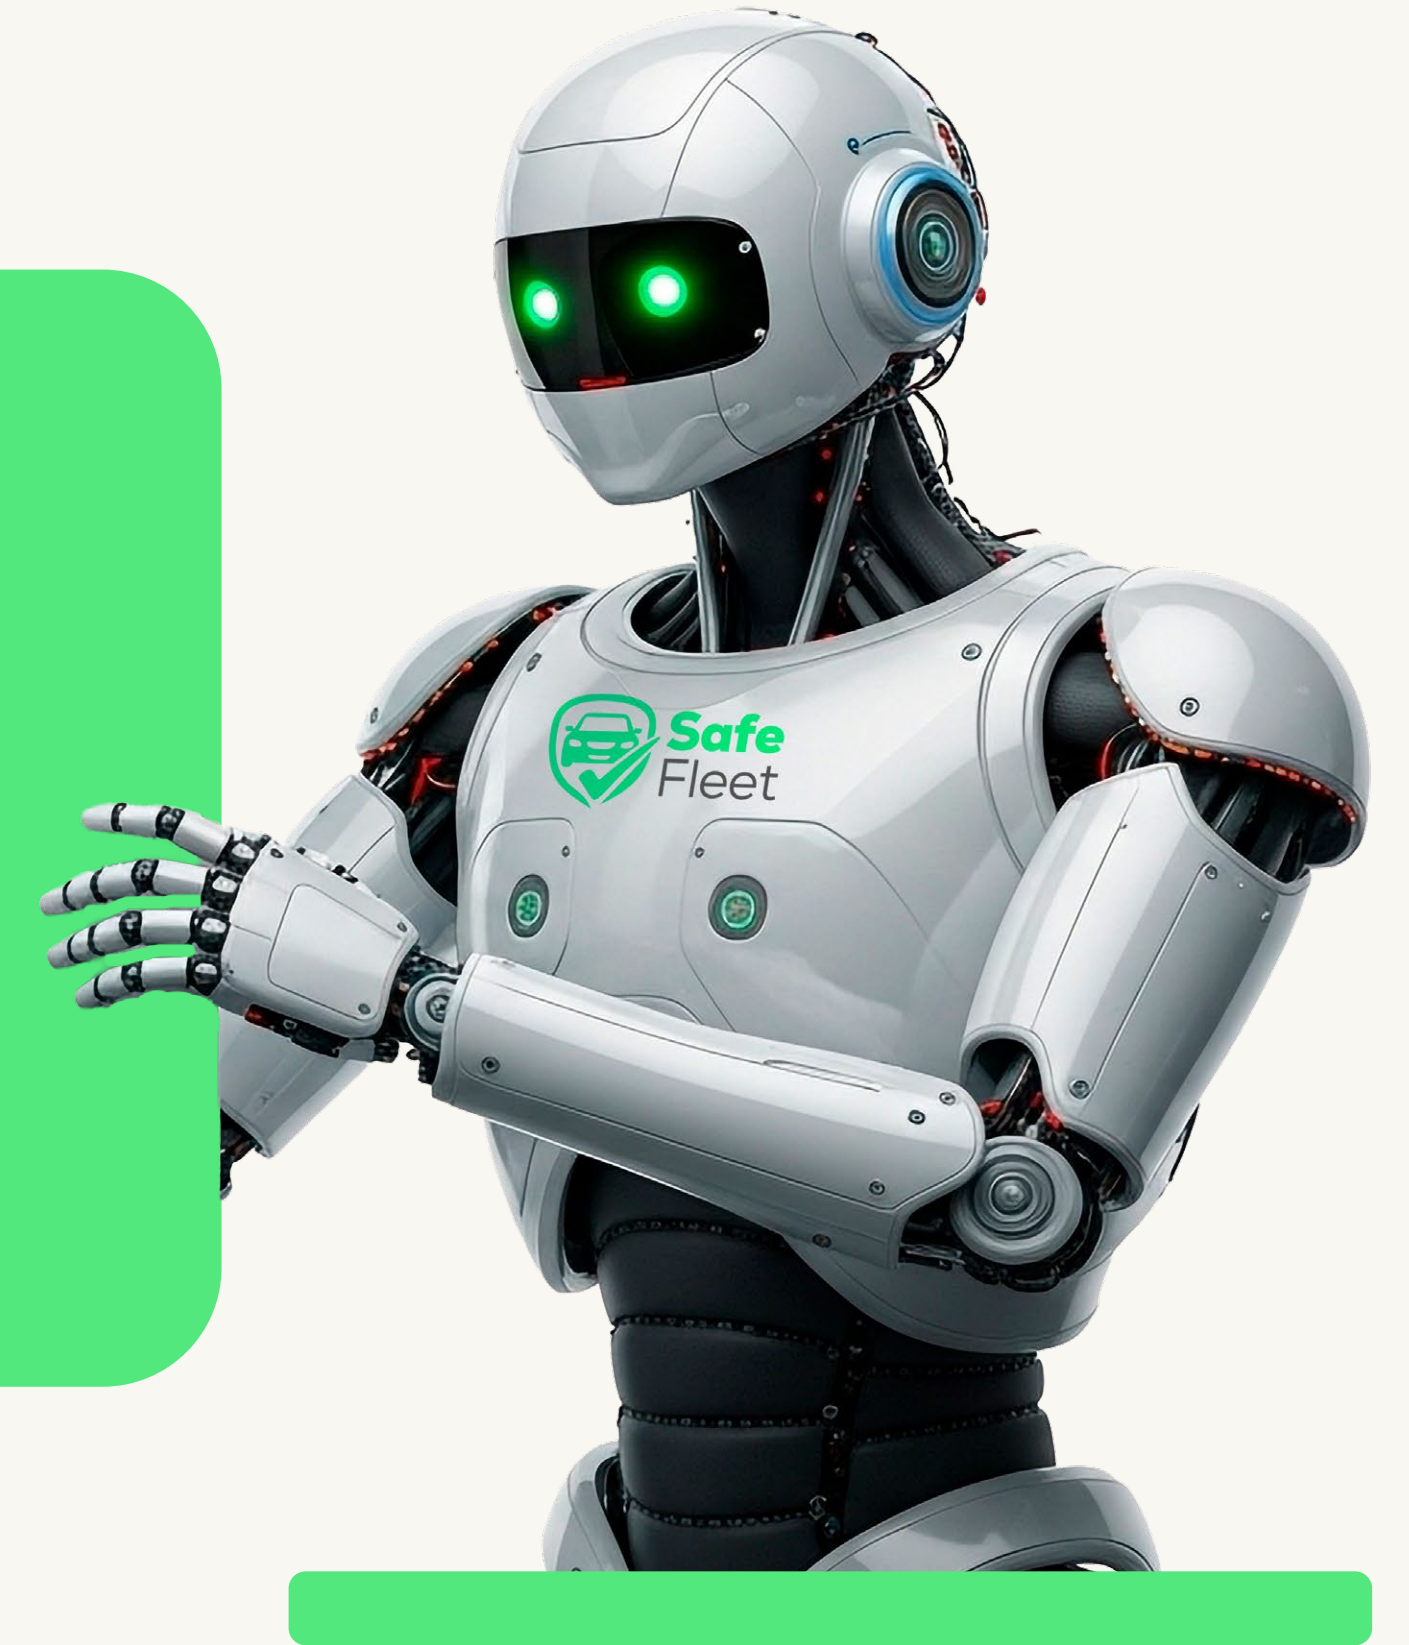

- ✓ **Main Dashboard:** overview of users, vehicles, and attendance.
- ✓ **Attendance:** daily control with charts and filters.
- ✓ **Users:** creation, editing, and staff roles.
- ✓ **Vehicles:** fleet registration and control.
- ✓ **Calendar:** monthly/annual planning, Excel export.

SafeFleet

Main benefits

- ✓ **Administrative time savings.**
- ✓ **Guaranteed compliance** (automated alerts and expirations).
- ✓ **Unified data** for faster decisions.
- ✓ **Better employee experience** and greater transparency.
